

```
module m1
  interface
    [opaque t
```

```
    z : t
    s : (t -> t)
    is-z? : (t -> bool) ]
```

opaque t 的作用范围

```
  body
```

```
    [type t = int
```

type t = int 的作用范围

```
      z = 33
      s = proc (x : t) -(x, -1)
      is-z? = proc (x : t) zero?(-(x,z)) ]
```

```
let f = proc (x : from m1 take t) ...
in ...
```

from m1 take t 的作用范围  
(模糊类型)
